

Healthcare and Life Sciences on AWS

Modern cloud technology is transforming the healthcare industry

Whether it's creating data pipelines that accelerate pharmaceutical research, implementing large and scalable patient databases, or developing machine learning-based applications to automate medical coding, AWS is transforming the healthcare and life sciences industry.

But it takes extensive skill and experience to effectively leverage the wide range of services from AWS. That's why dozens of organizations in healthcare, pharmaceuticals and medical research choose to work with ClearScale. As an AWS Partner Network (APN) Premier Consulting Partner with the Healthcare Competency, our deep-seated cloud expertise is helping to make positive change in the healthcare industry.

Healthcare & Life Sciences on AWS - Benefits

Artificial Intelligence / Machine Learning

Develop Artificial Intelligence (AI) and Machine Learning (ML) applications to predict patient readmissions, provide predictive analysis for early detection of diseases, predict when patients will fail to show up for appointment, perform advanced clinical research, and more.

Security and Compliance

Secure protected health information (PHI) and meet HIPAA regulatory compliance requirements, and leverage more than 1,800 security controls available in AWS.

Data Lake

Build a data lake for collecting healthcare data, extract insights from the data, and provide visualizations to present the data and share insights.
